

Construction Management

Engineering design with innovative solutions

Inspection of Deep Foundation Installation

Structural Framing Inspection

Concrete and Rebar Inspection

ABOUT US

Albrecht Engineering, Inc. offers construction management, environmental engineering, structural engineering and geographic information systems (GIS) services. We take pride in our successful track record, bringing a combined experience of seventy years of construction management and inspections to private, industrial and public projects. Our construction management team includes members with senior levels of experience in terminal operations, thus understanding the demands of capital intensive transshipment systems.

The Albrecht team has a proven track record of completing large, complex projects on time and on budget; most recently for clients such as CSX Transportation, CONSOL Energy, Inc., and The Maryland Port Administration. We offer turn-key project management services from concept and planning development to the commissioning of projects. Albrecht Engineering's structural, environmental, and civil engineering component stands ready to provide analysis, design, and cost effective engineering services to our clients.
