## Engineering design with innovative solutions

### ABOUT US

Albrecht Engineering, Inc. is a woman-owned consulting firm founded in 2008 by Rachel Albrecht. We provide engineering design and analysis, construction management and geographic information systems (GIS) services. We take pride in our successful track record, bringing a combined experience of forty-five years of structural engineering to private, industrial and public projects.

Our staff can provide excellence in coordination and practical cost effective solutions to even the most difficult structural challenges. We have a proven track record of completing design projects on time and on budget.

### TYPES OF SERVICES

- ◆ Structural Engineering Design
